B.I.S.E Mirpurkhas

# KHALIL RIND

## Front-End Developer

[itsrealkb.github.io/Portfolio](https://itsrealkb.github.io/Portfolio)

## PROFILE

Meet **Khalil**, the **Front-End** developer who turns coffee into code and designs into digital masterpieces. With a passion for pixels and an eye for detail, I can turn your website dreams into a reality faster than you can say "browser compatibility". Just don't forget to bring the **coffee!**

## PROJECT EXPERIENCE

### PORTFOLIO

Link: [itsrealkb.github.io/Portfolio](https://itsrealkb.github.io/Portfolio)

Key Points:

- The project is built using React.js, HTML, and CSS.
- This is a personal portfolio with elegant design and animations showcasing some of the projects I've created.
- The project has a responsive design, which means it looks great on all screen sizes, including mobile devices.

### TENZIES GAME

Link: <https://iyq3ce.csb.app/>

Key Points:

- The project has a responsive design, which means it looks great on all screen sizes, including mobile devices.
- The project showcases how to use React.
- The project uses React to provide a professional and polished look to the user interface.

### NOTES APP

Link: [kbs-notes-app.netlify.app](https://kbs-notes-app.netlify.app)

Key Points:

- The project is a React application that allows users to create update and delete notes.
- It showcases how to use React's component and state management features to create dynamic and interactive user interfaces.
- The project uses the React "useState" hook to manage the notes and to update the user interface when a new note is added.

### ADVANCE QUIZ APP

Link: [advance-quiz-app.netlify.app/](https://advance-quiz-app.netlify.app/)

Key Points:

- The project is a web application that allows users to choose quiz questions category, difficulty and no of questions too.
- The project is built using React.js, which provides a robust set of tools and libraries for building interactive user interfaces.
